## Summary

I'm a Flutter developer focused on building responsive, intuitive, and visually polished mobile apps. I write clean Dart code, have a strong grasp of OOP, and care about detail, performance, and user experience. Comfortable with API integrations and team collaboration, I'm always learning and committed to delivering quality work.

## Education

### B.Sc. in Computer Science

Federal University Lafia

Oct, 2018 - Jan, 2024

## Technical Skills

Dart, Flutter, Firebase, Clean Code, API Integration, Flutter Testing

## Soft Skills

Collaboration, Problem-solving, Communication, Time management

## Languages

English, Hausa

## Certifications

- Flutter & Dart - The Complete Guide - Maximilian Schwarzmüller - Udemy
- The Complete Dart Development Guide - Hassan Fulaih - Udemy

## Work Experience

### HIIT Plc

Intern, Training Division

Feb, 2022 - Oct, 2022

I developed Python apps using Tkinter & Django, obtaining certifications in Python and Digital Marketing. I applied UI/UX design principles and collaborated with cross-functional teams to enhance software efficiency and user experience.

- Recognition as the Best Intern in my batch.
- Applied UI/UX strategies to enhance usability and overall product experience.
- Earned certifications in Python programming and Digital Marketing to support well-rounded project development.

## Projects

### Gidah - Residential App [🔗](#)

Oct, 2024 - Dec, 2024

Developed a flutter residential app designed to offer smart housing solutions for students of Federal University Lafia. The app streamlined the process of finding, reserving, and managing student accommodations

- Integrated features such as real-time room availability, digital payment processing, and tenant support chat.
- Enhanced housing accessibility and transparency for students seeking accommodation.
- Improved convenience and operational efficiency for both students and property managers.

### Labari - News App [🔗](#)

Mar, 2024 - Apr, 2024

Built a news app using Flutter that aggregates global headlines and delivers category-based news filtering. Users can explore curated content by selecting specific topics of interest, providing a personalized reading experience.

- Implemented user authentication using Firebase Authentication to securely manage sign-ups and logins.
- Integrated external APIs using the http package to fetch and display dynamic data.
- Efficient state management with Riverpod, ensuring scalability and maintainability.
